## HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

For the fiscal year ended September 30, 2024, Scharf Multi-Asset Opportunity Fund Retail Class delivered a 19.00% return.

### WHAT FACTORS INFLUENCED PERFORMANCE

The Value and Low Volatility factors, our two primary stock selection criteria have materially lagged broader equity markets with accelerating underperformance since the Covid pandemic started. Trillions of dollars in fiscal stimulus and highly accommodative monetary stimulus facilitated a market led by Momentum and Growth factors. We believe the historically high valuation spreads between growth/momentum value/low volatility will close when the fiscal party ends. Our strategy remains focused on 'Quality' and 'Value' – which means identifying undervalued companies with predictable earnings trading at compelling valuations relative to their trading history. We seek to buy stocks with 30% plus upside to their median high trading ranges and limited downside to their median lows if our investment thesis proves incorrect. We use this upside vs. downside calculation to create a stock's Favorability Ratio. We believe this valuation support should provide downside protection while offering upside potential.
